December 17, 1973

TO: ELEC-TRAK TRACTOR DEALERS

SUBJECT: Brinly-Hardy VV-100 Rotary Tiller for use with Elec-Trak Tractors

We have just received notice from Brinly that their availability of Rototillers for the coming season is fixed, due to longer lead times to obtain parts for additional production. The VV-100 Tiller will be available in early February, 1974, and deliveries will be based on orders received on a "first-come, first-served basis until the number of orders equals our (Brinly's) scheduled production". Thus, order Tillers as soon as possible and specify delivery dates in the early spring. A Brinly order form is attached for your use in placing an order.

Brinly expects their lead time for production to stretch out even further for next year. In order to insure Tillers in 1975, Brinly will be requesting orders for Tillers prior to October 1, 1974, for delivery in the spring of 1975. A reminder of this will be sent to you in the Fall of 1975.

Remember, the early bird gets the Tiller!

Sincerely,

J. W. Stackhouse
