To All Elec-Trak Tractor Dealers:

There are some people who just want to do their own service, and that's all there is to it. Well, in response to a heavy demand from Elec-Trak tractor owners, we have published a Homeowner's Service Manual, an abbreviated form of our Product Service Manual like the one in your shop. And some dealers have requested them also; some for their customers and some for their sales personnel (it can make a great sales tool to help the very sophisticated and very curious customer). Drill a hole in the upper left hand corner and tie the manual to the wall near your Elec-Trak tractors.

We don't give these Homeowner's Service Manuals away, which you'll understand when you see it. We sell them to homeowners for \$5.95, but we'll sell them to you for \$4.95. Send your orders to Hazel Zents in Advertising, enclosing your check.

This manual is intended for use by the homeowner only after the twelve month warranty period has expired. Before then, you, as an authorized servicing dealer, are to perform any service he needs. If he works on it in the warranty period, he may void his warranty.

Sincerely,

R. S. Zullo
