A-Series The lawn care line.

Your best buy for care of small to medium size lawns. Choose from five models . . . 7 and 8 HP gas-powered models or two battery-powered riding mowers. Battery power lets you "fuel up" by simply plugging in to any 110 volt grounded household outlet.

B-Series Value leader for lawn or garden.

Great choice for the intermediate size lawn or garden. Plenty of power to pull a plow or disc and do over 25 different jobs with optional attachments, yet economical to buy and operate. Choice of either an eight or ten horsepower model; Four speed or automatic transmission. Or there's a new battery-powered "B" that mows, tills, moves snow.

C-Series Power and versatility to spare.

The ideal match for your medium to large lawn or garden. Five models in all: Four gas-powered tractors from 10 to 16 horsepower with manual or automatic transmissions; a quiet new battery-powered tractor in the 18 HP class. Full-size, fully featured and ruggedly built "C's" give you long lasting, trouble-free performance.

D-Series Biggest, brawniest tractors we've every built.

Three models meet the toughest challenge of large lawns and gardens. All feature dependable automatic transmission for easy, on-the-go control. At the top is the 19.9 HP twin cylinder, D-200. A truly deluxe model with a multitude of features such as disc turning brakes, 3-point hitch, deluxe seat and more for the person who wants the best we have available. The D-180 is an 18 HP tractor but with fewer deluxe features. Our economy model in this series is the 16 HP single cylinder D-160. All have capabilities to utilize the many "farm-type" implements available.

**We'll even tell you
which Series
best fits
your needs.
Just answer
these 5
questions:**

1 How much grass area do you have to cut?

- ☐ Less than 1/2 acre (100x200 lot maximum)
- ☐ 1/2 acre but less than 1 acre (150x290 maximum)
- ☐ 1-3 acres of grass
- ☐ More than 3 acres

2 Which of these combinations best indicates your intended use?

- ☐ Mowing only
- ☐ Mowing plus snow removal
- ☐ Mowing, snow removal and gardening
- ☐ Plowing, tilling, gardening and other heavy duty chores besides mowing

3 If plowing, tilling or gardening is required, how large of an area?

- ☐ Less than 1/2 acre
- ☐ About an acre
- ☐ 1-3 acres
- ☐ More than 3 acres

4 Would you say that your property is:

- ☐ Relatively flat with few obstructions?
- ☐ Flat with lots of trees, shrubs, etc.
- ☐ Hilly in spots, but few obstructions?
- ☐ Hilly with lots of trees, shrubs, maybe even a steep bank?

5 For what other uses (i.e., farm, orchard, nursery, spraying, etc.) would you use the tractor?

After you've answered the questions, fill in your name and address, tear out this card and drop it in the mailbox. We'll send you, without charge or obligation, our recommendation for the series of Wheel Horse lawn and garden tractors best suited to **your** needs.

WHEEL HORSE
lawn & garden tractors

Here's what a lawn and garden tractor can do for you.

Some people think tractors are just for mowing grass. But they do a lot more. Every one of our Wheel Horse tractors can do the things necessary to keep grass looking lush and healthy. Like sweeping, rolling, fertilizing and aerating your lawn. And if you're starting from scratch, Wheel Horse attachments for clearing, hauling, grading and spreading can help you create a lawn with that professional look. You get landscaping capabilities in a compact, affordable size. Whether your yard is half an acre or half a dozen, there's a Wheel Horse just right for the job. The wide range of attachments make sure the job is done right.

Wheel Horse capability doesn't stop with lawn care. B, C and D Series tractors are equally at home in your garden. Tilling or plowing, discing, and all the other time consuming tasks of starting a garden — can be accomplished fast. Wheel Horse attachments help you get the most out of your garden like keeping it weed-free after it's been planted. And there's one other important benefit too: The **fun** you get out of doing it.

Summer ends, but your Wheel Horse keeps going strong. Autumn clean-up chores don't seem like chores when you have a Wheel Horse garden tractor to help. Handy attachments speed leaf and debris removal, and shred refuse for the compost heap. A lawn sweeper or powerful lawn vacuum helps keep the lawn spotless. Other attachments let you haul fallen limbs and trimmings, sweep sidewalks and driveways. Whatever your job, Wheel Horse makes it easier.

Your Wheel Horse doesn't hibernate for the winter. When snow falls, say goodbye to shoveling. Front-mounted blades roll snow from driveways fast. Hungry snow throwers clear deep snow even faster. There's also a cab enclosure available to keep you out of the weather. Your Wheel Horse tractor gives you more time to enjoy winter.

Spring brings new life to your lawn and garden . . . and to your Wheel Horse. You're busy preparing your lawn or garden for another hearty growing season and it's all made easier with a Wheel Horse garden tractor.

What can a Wheel Horse do for you?

Almost anything required in lawn or garden maintenance, a Wheel Horse tractor can handle. Read on to see how Wheel Horse fits your lawn and garden tractor needs to the letter — whatever the challenge, whatever your lifestyle.

Get a Horse.

Wheel Horse, of Course!

D-SERIES

1

2

3

Our "D" Series tackles the big jobs.

Our top-of-the line "D" Series is loaded with extras to make your toughest job a breeze. Brawny and beautiful, these tractors handle as easily as the family car. Automotive steering linkage and soft-feel steering wheel team up for top control. Single-lever automatic transmission lets you choose infinite speeds with no clutching or shifting. The touch of a lever hydraulically raises and lowers either the 48" mid-mount mower or the 60" rear mount mower plus many other work-saving optional attachments.

Like all Wheel Horse tractors, safety is engineered into every "D" Series tractor. Key ignition, safety interlock system, and parking brake discourage tampering, help prevent accidents.

Unitized steel frame takes any punishment the job dishes out — yet you ride with comfort in the spring-mounted, polyfoam padded seat. Any way you look at it, the "D" Series tractors match the toughest challenge your yard or garden has to offer. And they do it in style.

D-200
AUTOMATIC

D-200 boasts a twin-cylinder, 19.9 HP cast-iron engine for smooth, vibration-free power. Complete with disc turning brakes for quicker, sharper turns while turning in soft or muddy soil during gardening applications, 3-point category "O" hitch which adapts to many "farm-type" implements, a front and rear PTO (power take-off) which delivers 2000 RPM for power driven attachments, full instrumentation, plus many more deluxe features.

D-180
AUTOMATIC

D-180 gives you a dependable 18 HP twin cylinder cast-iron engine for plenty of reserve power when you need it. Optional accessories tailor it to your tracting needs.

D-160
AUTOMATIC

D-160 rounds out the D-line of big job muscle. 16 HP single cylinder power plant gives this one plenty of spirit and economy. Ideal for large lawns and gardens or small acreage.

SPECIFICATIONS

GENERAL, ALL "D" TRACTORS: **Starter:** key electric **Battery:** 12 volt, 45 amp hr **Transmission:** Automatic (hydrostatic) **Ground speeds:** 0-7.3 mph forward, 0-3.6 mph reverse. **Wheel base:** 50" **Overall width:** 45"

Overall length: 75.5" **Overall height:** 45.5" **Weight:** D-200, 1150 lbs; D-180, 1070 lbs; D-160, 1005 lbs **Tires:** Choice of four styles: (1) Turf Saver 27x9:50-15 rear; (2) Xtra Traction Terra 26x12:00-12 rear; (3) Xtra-wide Terra-Grip (Cleat) 26x12:00-12 rear; (4) Super Terra-Grip Cleat (Not Shown) 27x8:50-15 rear. Standard on all "D" Series models is an 18x8:50-8 ribbed front tire. Tire options (1) and (4) feature reversible rims to allow choice of rear tread width.

ENGINES: **D-200:** 19.9 HP, 53.90 CID (Cubic Inch Displacement), 8 gallon fuel tank. **D-180:** 18 HP, 48.00 CID, 5 3/4 gallon fuel tank. **D-160:** 16 HP, 35.90 CID 5 3/4 gallon fuel tank.

See the many other Wheel Horse attachments for the "D" Series on pages 26 and 27 of this catalog. Allied attachments are also available through your Wheel Horse dealer. Ask him for a free attachment catalog.

C-SERIES

All around versatility marks the "C" Series.

Choose from four models in either 10, 12 or 16 HP sizes. Mowing, plowing, throwing snow or pushing dirt, these tractors get their power through an 8-speed manual or dependable automatic transmission. Spring mounted seats soak up the bumps. Tach-a-matic mid and front hitches speed up installation and removal of 48", 42" and 36" mowers plus several other work-saving attachments. Want to stretch your work day? Headlights and taillight are standard equipment on all "C" Series tractors for after-dark operation. The Wheel Horse "C" Series models are versatile problem solvers for your medium to large lawn and garden . . .

C-160 Automatic couples a 16 HP counter-balanced cast iron engine to an automatic transmission, giving you an infinite selection of ground speeds while maintaining constant mower speed. Ammeter and engine hour meter monitor engine performance while hydraulic lift gives you "finger-tip" control over implements. A deluxe soft-ride spring seat with arm rests increases operator comfort. All these, plus many more features are standard equipment on this deluxe "C" Series model.

C-160 8-speed gives you six forward speeds and two reverse, manual transmission, and a 16 HP counter-balanced cast-iron engine for maximum performance at an economical price.

C-120 Automatic has the rugged combination of 12 HP cast-iron engine and automatic transmission for power and maneuverability. Match this one to a 42" mower and lawn vacuum for an unbeatable combination in lawn care maintenance.

C-100 8-speed, an economical, full-size, basic garden tractor with the capability to plow, till, disc, cultivate and prepare the toughest ground, yet gentle on the thickest lawns.

SPECIFICATIONS

GENERAL, ALL "C" TRACTORS: **Starter:** key electric **Battery:** 12 volt 42 amp hr **Transmission:** Infinite speed automatic drive (C-160, C-120) or manual 8-speed (C-160, C-100) **Ground speeds:** Automatic models;

0-6.5 mph forward, 0-3.2 mph reverse. .5 to 5.4 mph forward, .7 to 2.6 reverse for 8-speed models. **Wheel base:** 45.5" **Overall width:** 36" **Overall length:** 65" **Overall height:** 41" **Weight:** C-160 automatic, 760 lbs; C-160 8-speed, 710 lbs; C-120 automatic, 700 lbs; C-100 8-speed, 625 lbs. **Tires:** Standard (Turf Saver) 23x8:50-12 rear, 16x6:50-8 front. Cleat 23x8:50-12 rear is available as dealer installed option.

ENGINES: C-160 Automatic and 8-speed: 16 HP, 35.90 CID (Cubic Inch Displacement), 2 gallon fuel capacity. C-120 Automatic, 12 HP, 29.10 CID, 2 gallon fuel capacity. C-100 8-speed: 10 HP, 23.90 CID, 2 gallon fuel capacity.

See the many other Wheel Horse attachments for the "C" Series on pages 26 and 27 of this catalog. Allied attachments are also available through your Wheel Horse dealer. Ask him for a free attachment catalog.

B-SERIES

First choice in yard or garden.

Just look at these features that make the "B" line our best seller. Big Turf Saver tires float over your valuable lawn . . . 36" side or rear discharge mowers mount quickly into the Tach-a-matic™ mid and front hitches . . . spring mounted, fully padded seat smooths out the bumps and jolts. You'll like the safety features, too. An interlock system prevents accidental starts . . . parking brake holds tractor securely when not in use. The "B" Series tractors, like all models in the 1975 Wheel Horse line, carry the OPEI (Outdoor Power Equipment Institute) safety label. Come winter, both "B" models pack plenty of muscle to handle a snow blade or hefty 37" snow thrower.

If you need a machine that does more than just cut grass, and you have an intermediate size lawn or garden, choose a "B" Series tractor from Wheel Horse.

B-100. A great match: 10 HP cast-iron engine and dependable automatic transmission. Single lever control does away with shifting in and out of gears — no more clutching. Optional hydraulic lift for raising and lowering attachments can be installed by your dealer.

B-80 is the value leader from Wheel Horse. Its spunky 8 HP cast-iron engine supplies maximum power through our patented Uni-Drive all-gear transaxle. You get three forward speeds and one reverse. Separate brake and clutch pedals make for safe starts on sloping terrain. Choice of optional 36" mower, either side or rear discharge, makes this model our number one, all-around performer.

SPECIFICATIONS

GENERAL: Starter: key electric **Battery:** 12 volt, 42 amp hr (B-100) 24 amp hr. B-80) **Transmission:** Automatic (B-100) 4-speed manual (B-80). **Ground speeds:** (B-100) 0-6.2 mph forward, 0-3.2 mph reverse.

(B-80) 1.9 to 5.4 mph forward, 2.6 mph reverse **Wheel Base:** 43.5" **Overall Width:** 35" (B-100), 33" (B-80) **Overall Length:** 63" **Overall Height:** 40" **Weight:** (B-100) 670 lbs, (B-80) 570 lbs **Tires:** Standard (Turf Saver) 22.5x7:50-12 rear, 16x6:50-8 front. Cleat 23x8:50-12 rear is available as dealer installed option.

ENGINES: B-100 10 HP, 23.9 CID (Cubic Inch Displacement), 2 gallon fuel capacity. B-80 8 HP, 18.6 CID, 2 gallon fuel capacity.

See the many other Wheel Horse attachments for the "B" Series on pages 26 and 27 of this catalog. Allied attachments are also available through your Wheel Horse dealer. Ask him for a free attachment catalog.

A-SERIES

Lawn care only? Try our "A" Series.

Designed primarily for the homeowner with a small lawn, the "A" Series meets your needs exactly . . . no more, no less. Compact enough to fit in that small corner of your garage, but rugged enough to give you years of quality performance.

A-80 4-speed . . .

A mid-mount 32" mower is standard equipment on both A-80 models. Twin cutting blades give your lawn a well manicured look, and the A-80's compact design lets you mow in close to flower beds, shrubs, trees and other tight spots. It's built to last like bigger Wheel Horse tractors with all-steel frame, hood, grille, running boards and fenders. Many other "big tractor" features, too. Like all gear 4-speed transmission, separate brake and clutch pedals and a 3-way safety interlock system that helps prevent accidents. Turf Saver tires glide over your lawn. You can also sweep, aerate, roll your lawn . . . haul debris and other materials . . . even clear light snow in the winter.

The A-50 rear engine rider gives you

lawn tractor features . . . smart styling, too. 7 HP engine delivers power to an all-gear transaxle, providing 2 forward and 2 reverse speeds. 26" single blade, side discharge mower has special blade brake to stop it fast . . . mower clutch lever is mounted up front for operating ease. Electric key starting and safety interlock system help prevent accidental starting with mower engaged.

SPECIFICATIONS

A-80 GENERAL: Starter: recoil or key electric Battery: 12 volt 24 amp hr (electric start model) Transmission: Manual 4-speed Ground speeds: 1.8 to 5.1 mph forward, 2.4 mph reverse Wheel Base: 42.5" Overall Width: 30.5" (41.5" with mower) Overall Length: 56.5" Overall Height: 36.5" Weight: 495 lbs (A-80E), 460 lbs (A-80R) Tires: 18x8:50 rear, 13x5:00-6 front Engine: 8 HP, 18.70 CID (Cubic Inch Displacement) 1 1/2 gallon fuel capacity.

A-50 GENERAL: Starter: key electric Battery: 12 volt, 24 amp hr Transmission: Manual 4-speed (2 forward, 2 reverse) Ground Speeds: 1.95 to 3.55 mph forward, .97 to 1.76 mph reverse Wheel Base: 37" Overall Width: 36.5" Overall Height: 38" Overall Length: 60" Weight: 290 lbs Tires: 4.10x3:50 front and rear. Engine: 7 HP, 15.0 CID (Cubic Inch Displacement) .5 gallon fuel capacity.

See the many other Wheel Horse attachments for the "A" Series on pages 26 and 27 of this catalog. Allied attachments are also available through your Wheel Horse dealer. Ask him for a free attachment catalog.

Quiet. Clean. Odorless. And all the power you need for

Unexpected strength

You'll be surprised at the capabilities of these four new battery-powered "Horses." Why? Because electric power rises to the challenge when the load gets tough. The heavier the load, the higher the motor torque . . . up to ten times normal capacity! That's why all modern locomotives and many industrial lift trucks are powered by electric motors. Strength to spare.

Stamina for big jobs

Up to 3¼ acres of mowing on one charge. That's real endurance; and it's verified by an independent testing laboratory.* Capabilities for all Wheel Horse battery-powered models are shown on page 9. C-185 and B-145 models feature handy panel meters to indicate "fuel" level and power use at a glance. Even if you work until the unit stops, let it stand for ten minutes then turn it on again . . . there'll be enough energy left to get you up to an electrical outlet.

*Test data available upon written request.

Mow an acre for pennies

That's right; just about 8¢ an acre to mow your lawn (based on average national electric rates at time of publication). To refuel, just plug in to any 110 volt grounded household outlet and switch on the charger. Nearly full power is restored to the batteries overnight, 25% power after just one hour.

Reduce maintenance costs

Forget costly tune-ups. No more sparkplugs, points, filters or mufflers to replace. No carburetors to clean or adjust. No more messing with gas cans or oil changes. Battery-power eliminates much of the cost and bother of tractor maintenance. Simply check the water level in the batteries once a month and you're ready to go. Batteries are conveniently located for speed and ease of maintenance. Front mower for B-145 and C-185 unplugs and flips up for cleaning or blade removal.

Enjoy the quiet

There's a new sound to lawn and garden care:

Quiet. Mow early in the morning or late in the evening without rousing the neighbors. All you hear is the gentle whirr of mower blades. There's a new *feel* to battery-power too. Vibration and heat are replaced by smooth, reliable electric drive.

More than mowing

Wheel Horse B-145 and C-185 garden tractors do more than just mow. They'll go to work in your garden.

Powerful 30" tiller pulverizes soil with its own independent motor. Move snow fast in winter with a blade or snow thrower.

Safe, easy operation

An interlock system helps prevent accidental starting of tractor or attachments. A built-in seat switch cuts power instantly should you leave the seat for any reason (A-65, B-145, C-185 models). Easy-to-understand controls make operation a snap. Balanced design gives you surefooted handling. Quiet, clean, odorless ride turns lawn and garden chores into pure pleasure. Test drive one at your Wheel Horse dealer today and you'll see what we mean.

any lawn & garden task.

Mowing range could be affected by density of growth, length of grass cut, grass moisture content, terrain, temperature and mowing speed. Tilling range could be affected by such factors as soil characteristics, tilling depth, tilling speed. Whatever your range requirements, there's a battery-powered Wheel Horse rider or tractor to fit your needs perfectly.

**Ask your dealer
why we call these the
"sensible alternatives" for '75.**

A-60

Includes 32" mower

Separate brake and clutch pedals

Mow up to an acre with this quiet "Horse."

The convenience of battery power ... all the built-in dependability of the Wheel Horse name — that's our A-60. All-steel construction assures long lasting service and gives you solid handling. You refuel by plugging in to any 110 volt grounded household outlet and turning on the charger. That's all. In 12 hours the three 12 volt batteries are recharged and ready to roll. The on-board charger automatically switches to "trickle" charge after cycle is completed ... keeps the batteries fresh until you're ready to mow. Cost? Under 10¢ per charge.*

A-60 comes equipped with a 32", twin blade mower. The side discharge chute disperses grass clippings gently and evenly. Cutting height adjusts 1½" to 3½" from the driver's seat.

Talk about handling. The A-60's wide stance, low profile design hugs the ground for stability on rough terrain. Large Turf Saver tires protect your lawn. All-gear transmission lets you select five forward speeds or one reverse in a straight-line shift pattern. Safety interlock system reduces the possibility of accidental starts. Added convenience features include a "fuel" gauge and a bump-absorbing seat springs.

*Substantiating data available upon written request.

Compact riding mower gives nimble handling.

Climb into the comfortable polyfoam seat and take hold of the deep dish steering wheel. A combined brake and clutch pedal simplifies operation; six-speed all-gear transmission lets you select the best speed for the job ... five forward and one reverse in a straight-line shift pattern. Mower height adjusts 1½" to 3½" from driver's seat. A safety interlock system lessens the possibility of accidental starts.

A-65's 24" turning radius comes in handy in tight places. Around trees. Next to flower beds. Any place there's an obstruction to maneuver around. Compact design gives you great visibility as you mow a wide 36" swath with built-in mower. Full-floating action results in a smooth mowing job every time you use the A-65. The on-board charger "refuels" the three 12 volt batteries in the A-65's power pack. Mowing isn't all the A-65 can do. Other lawn care attachments include a lawn sweeper, lawn roller, aerator or dump cart.

A-65

Combined brake, clutch pedal

Six-speed transmission

B-145

Single lever control

Headlights are standard

Big tractor performance for mowing and gardening.

B-145 — one of two battery-powered garden tractors for 1975. Heart of this new Wheel Horse is its power pack: Six heavy-duty 6 volt batteries and an on-board charger. Ample muscle for the drive motor with plenty left over to power an optional mower, tiller or snow thrower. And the power pack recharges overnight.

A dash-mounted speed control lets you choose three forward and two reverse speeds in each of four gear ranges. Twelve forward speeds at your fingertips! A "Power Pulse" switch gives you an extra burst of power for short durations. Great for tackling hills and slopes. Handy gauges let you know how much "fuel" you're using and how much is left. You ride comfortably in spring-mounted, polyfoam seat.

Optional front-mount mower cuts a wide 42" path with three blades. Rear discharge is standard, but your dealer can modify mower for side discharge with optional conversion kit. Electric front lift raises and lowers mower at the touch of a switch.

A wide range of lawn and garden attachments is available to increase the versatility of your B-145.

C-185

Cruise control

Foot accelerator

Power to spare for mowing, tilling, and lots more.

The biggest battery-powered garden tractor you can buy! Big performance, too. C-185 dishes out power for any job with 28 forward speeds and 12 reverse. Foot accelerator gives you seven forward and three reverse speeds in each of four gear ranges. Select forward or reverse at the flip of a switch. You'll also like the Cruise Control that lets you take your foot off the accelerator and choose either of two constant working speeds. Spring mounted, polyfoam seat, wide foot rests and large "soft feel" steering wheel treat you to comfortable, positive control of the tractor. Like all Wheel Horse tractors, the C-185 is engineered for safety. Seat switch and interlock system make sure the tractor starts only when you want. A "non-restart" feature prevents tractor starting until speed control is returned to "stop" position.

Look at these work saving attachments available for your C-185: 42" Front Mower, Lawn Sweeper, Lawn Roller, Aerator, Dozer/Snow Blade, Snow Thrower, 30" Tiller, Harrow, Dump Cart and Wagon.

An inverter accessory provides 120 volt household power anywhere . . . for power tools, temporary lighting, emergency power.

FEATURES

Flip-up front mower

Unplug the optional 42" front mower (5-1700) and flip it up for easy cleaning. You can sharpen or remove the mower blades quickly . . . right in the field. And the entire mower detaches easily by pulling a few pins, disconnecting the PTO plug and backing the tractor away from the mower. That's all. No lifting, pulling or struggling with clumsy belts.

Side or rear discharge

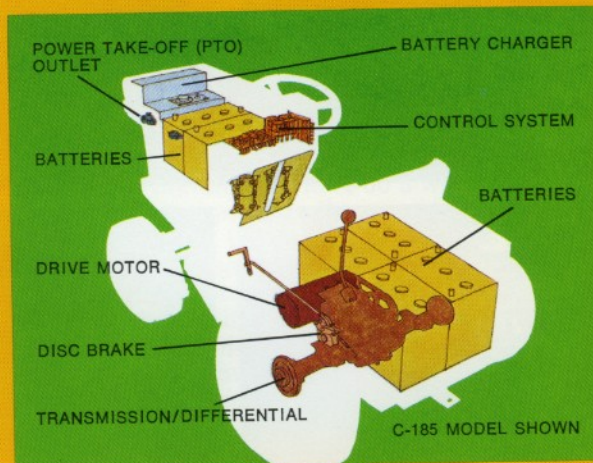

42" front mower (B-145, C-185) has standard rear discharge, but can be dealer-modified for handy side discharge with optional conversion

kit. Rear discharge style is ideal for use with Wheel Horse sweepers.

Straightforward design

Wheel Horse design takes the "black magic" out of battery-power. Clean electrical circuitry and simplified power control system make operation as logical and easy as the family car.

ATTACHMENTS

30" Tiller (7-1270)

Adjusts to two different tilling angles and is raised or lowered at the flip of a switch. Tines are driven by an independent electric motor. Plugs in to 36 volt rear outlet.

48" Snow/dozer blade (6-0700)

Angle of blade adjusts from driver's seat.

42" Snow thrower (6-0740) takes a big bite in snow. Has its own high-torque drive motor that sends snow flying through adjustable discharge chute (adjusts from driver's seat). Rear-mounted weight box included.

Inverter Accessory plugs into accessory outlet to provide 120 volt household power where you need it.

GENERAL SPECIFICATIONS

	Batteries	Transmission	Wheel Base	Length	Width	Height	Tires	Mower	Cutting Height	Weight
C-185	Six 6 Volt	Mechanical-Electric 28 forward speeds, 12 reverse speeds	39.5"	74.4"	41"	42.5"	Front: 16x6:50-8 Rear: 23x10:50-12	Optional 42" Front-mount (1)	1½"-3½"	900 lbs.

GARDENING

Wheel Horse helps make gardening more productive.

These days, home gardening makes good sense. Whatever your reason—economy, quality or simply the pleasure of growing your own food—gardening success depends on time-proven basics. One of those basics is a Wheel Horse garden tractor. An array of attachments lets you till, plow and break up the soil for planting. Manual and automatic transmissions provide plenty of power to break through the toughest soil.

"D" Series gardening system. A heavy-duty tiller pulverizes soil with a wide 50" swath. Removable outer tines reduce width to 38", if desired. And it mounts easily on a 3-point hitch, getting its muscle from a quick-connect rear PTO. Allied attachments, such as a moldboard plow or planter-fertilizer increase "D" Series tractor capability. Other available attachments include a tandem disc harrow, spring shank cultivator and tool bar. Any of these attachments can

be matched to the job by your Wheel Horse dealer.

"B" and "C" garden power. Wheel Horse engineered attachments make these tractors top performers in your garden. Add a 36" quick mount tiller and get a tilling depth of 4" to 6". Special end covers and drag plate help prepare a smooth seed bed and keep dirt from covering up plants in adjoining rows. Break up the soil to desired texture with the Wheel Horse 8-blade disc or 18-blade spike tooth harrow. When your efforts begin to sprout, a cultivator mounts easily to your tractor for weeding. Its nine shovels are reversible for extended wear. You can even get a shredder-grinder attachment to help build your compost heap. Battery-powered B-145 and C-185 take a hefty 30" tiller. It has two tilling angles and is raised or lowered by electric lift. Both tractors also take the spike tooth harrow.

(1) 32" disc for "B" and "C" series tractors breaks up soil after plowing. (2) Tiller attached to B-100 cuts a wide 36" swath. (3) Moldboard plow, shown on C-100, is available as an allied attachment.

Improve your lawn's appearance with less effort on your part.

Sit down on your Wheel Horse tractor and head for a well groomed lawn. Sturdy rotary mowers feature full height adjustment and floating action — choose from side or rear discharge styles.

Lawn care with the "D" Series. Choose mid or rear mount rotary mowers to get the job done. Full-floating 48" side discharge mid-mount mower has three blades to assure smooth, even cut. Giant 60" rear mount mower attaches to 3-point hitch and gets its power from a quick-connect rear PTO. It mows large acreage fast. If you have heavy grass or weeds to mow, a 48" sickle bar may be what you need.

Ganged reel mowers are available in various configurations to fit your requirements.

"C" Series lawn power gives you a choice of four mid-mount rotary mowers: 48" and 42" side discharge models or a 36" model in side or rear discharge design. All feature full-floating action and

have three hi-lift blades that lift grass for even cutting. 42" side discharge mower is ideally suited to a lawn vacuum that cleans while you mow. Picks up leaves, grass clippings, twigs, and litter. Battery-powered C-185 can take a 42" front mower that can be modified for either side or rear discharge. Wheel Horse sweeper, roller and aerator simplify lawn grooming. Allied attachments such as sickle bar mowers, thatcher and spreaders help to round out the "C" Series line.

"B" Series. Choose a 36" side or rear discharge mower to get the cutting done fast. Hook up to a 31" or 38" lawn sweeper and you've got a great mowing system that cuts and sweeps in one pass. B-145 battery-powered tractor accepts the 42" front mower.

"A" Series. A-80 comes equipped with a twin-blade 32" mower to handle mowing requirements of the small lawn. Packs enough power to pull sweepers, aerator, roller . . . and can be equipped with a handy grass bag to catch clippings.

Two battery-powered riding mowers provide clean, quiet operation for small lawns. A-60 has a 32" mower built right in . . . A-65 comes with a 36" mower. Both recharge for pennies on household current. A-50 rear-engine rider cuts through tough grass with a single blade 26" mower.

(1) C-120 Automatic with lawn vacuum keeps lawn neat as you mow. (2) C-160 8-speed with 42" side discharge mower. (3) Hinged chute on 48" and 42" mowers aids in transporting through tight places. (4) 60" rear mower mounts on 3-point hitch of "D" Series tractors and is PTO powered. (5) B-145 battery-powered tractor mows up to 3 1/4 acres with 42" front mower.

Flexibility of attachments gives your yard a professional touch.

Styling a new yard or shaping up your existing one? Let Wheel Horse lend some expertise. "B", "C" and "D" Series tractors power you through to completion of the project. Handy attachments move dirt and other materials . . . level ground for seeding . . . even haul the materials you'll need to do the job. Your Wheel Horse is great for handling grading and leveling jobs in places where big machinery won't fit. Wheel weights and cleat tire options give your tractor better footing in soft or muddy soil.

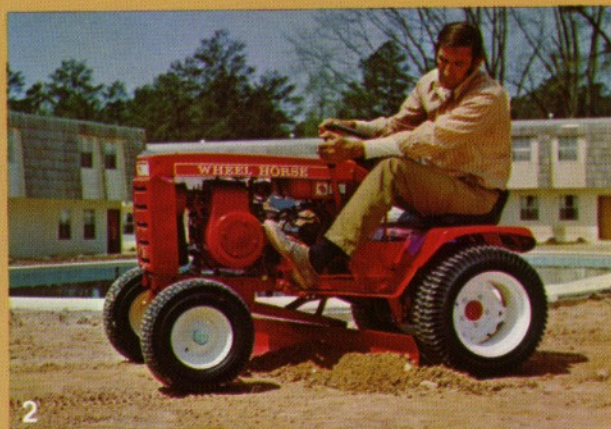

"D" Series landscaping aids include a front-mount 56" dozer blade that gives you lots of push with dirt, sand and gravel. Has a reversible scraper bar for long wear. A 50" mid-mount blade is perfect for grading and terracing. It raises and lowers hydraulically and provides 20° index left or right. Allied attachments boost "D" Series usefulness. Rear-mount grader blade mounts on 3-point hitch and has indexes of 15°

and 30°. A front-end loader handles 500 lb. payload — all hydraulically. Landscaping rake and leveling attachments spread material on driveways, parking areas, ball fields, and other locations.

"C" Series tractors give you a choice of 56" wide or 42" dozer blade or 40" mid-mount grader blade. All blades mount easily on Tach-a-matic hitches and raise or lower from drivers seat. A front end loader is also available through your Wheel Horse dealer, as well as other landscaping attachments. Battery-powered C-185 handles dirt and other materials with 48" dozer blade.

"B" Series has power enough to handle a 42" dozer blade or 40" grader blade for any of the landscaping tasks your yard offers. Maneuverable size, affordable price. A special 48" dozer blade attaches to battery-powered B-145 tractor to handle your landscaping jobs.

(1) Hefty 56" dozer blade on "D" Series tractor moves lots of dirt for landscaping jobs. (2) Grader blade, shown on B-80, is ideal for grading, leveling and terracing. (3) When your landscaping efforts begin to blossom, your Wheel Horse keeps on helping!

Even the heavy work of lawn and garden care is made easier with your Wheel Horse tractor.

Whatever the chore — lawn care, gardening, landscaping, debris removal — there's always hauling to be done. Take a load off your back and let your Wheel Horse do it. Two and four-wheel wagons hitch up to your tractor to carry bulky items. For lawn care, wagons are great for lugging around bags of seed and fertilizer, hand tools, even loose materials like dirt and humus. The same goes for gardening. These wagons stretch the capability of your tractor and save you energy. They'll haul big loads of peat moss, buckwheat hulls, wood chips and other popular mulches. Or you can transfer clippings, leaves, garbage and other materials to your compost heap. The 2-wheel wagon dumps completely for easy unloading, making it fine for filling up holes in yards or driveways. It's all steel and carries

loads up to 415 pounds. It tracks neatly behind your tractor on big pneumatic tires. The four wheeler is a husky wagon for big loads. It hauls up to 600 pounds in its 11 cubic foot box. You can quickly remove side and end panels for hauling bulky loads.

Both wagons can be used with Wheel Horse "A", "B", "C" and "D" Series tractors. Special allied attachments also increase the hauling ability of your "D" Series tractor. These include a rear fork lift kit and a lift boom, both requiring a 3-point hitch.

Whatever you have to haul, do it easier with a Wheel Horse.

(1) 4-wheel wagon hauls a big 600-pound payload to help out with your lawn and garden chores. (2) Handy 2-wheel dump cart takes loads up to 415 pounds — puts material where you want it. (3) B-100 with 4-wheel wagon is a big help for the "mini" farmer.

Big clean-up job ahead? Here are a few handy tips to make the job go faster.

Cleaning up after a storm or routine lawn maintenance, your Wheel Horse helps keep your spread neat. Cut up fallen limbs and load them into a handy wagon . . . carry away trash, leaves or clippings, too.

"D" Series. They whisk away leaves and clippings easily with 31" or 38" lawn sweepers. If you're pruning trees or clearing away fallen branches, a 2 or 4-wheel wagon can hold lots of debris. A rotary broom available through your Wheel Horse dealer helps clear walks, drives and parking lots. It sweeps a wide 48" path and hooks into the front PTO. There's even a 48" sickle bar mower available to help you clear out weeds.

"C" Series tractors tackle the big clean up jobs. All four models easily tote 2 and 4-wheel wagons to haul away debris. Keep your yard spotless with a power lawn vacuum that cleans while you mow. Unit attaches to side discharge chute of 42" mower and empties debris into special hopper that fits on 2-wheel dump cart. Powerful enough to pick up clippings, leaves, twigs and litter. Empties by simply dumping the cart. Rotary broom sweeper is also available.

"B" and "A" Series tractors easily tote a 31" or 38" sweeper to assist you in picking up grass clippings, leaves and other litter. Sweeper dumps completely to the rear without leaving operator's position. All models also handle two-wheel dump cart for hauling debris.

However big your clean-up job . . . your A, B, C or D Series tractor helps keep your yard trim and neat.

(1) C-160 8-speed teams up with 4-wheel wagon to clean up debris. Sides remove for bulky loads. (2) Power lawn vacuum makes fall lawn care a breeze. (3) Wheel Horse lawn sweeper — shown here with B-145 battery-powered tractor — holds big loads of clippings and leaves. Rear dumping is fast, easy.

3

Back saving equipment gets rid of snow fast . . . lets you enjoy winter more.

Your Wheel Horse thrives when the white stuff falls — no need to stow it away for the winter. There's a model to fit your individual snow handling needs, large or small. Add wheel weights and chains and you've got a real snow machine.

Powerful "D" tractors keep going in deep snow. Choose a husky 56" dozer blade to push snow out of the way fast . . . or hook up a powerful 48" snow thrower to clear deep snow even faster. Powered by a front PTO, it cuts through deep drifts easily. Mounts on front Tach-a-matic hitch. Thrower raises and lowers hydraulically, and 240° rotation of chute lets you put snow where you want it. A cab enclosure is also available to keep you snug as you clear the driveway.

"C" Series tractors team up with a 42" snow thrower or 42" blade to make short work of snow. Snow thrower mounts in front of Tach-a-matic hitch and has 180° chute rotation to let you put

snow where you want it. Cab enclosures available to fit this line, too. C-185 battery-powered tractor has its own cold weather gear. Attach a 42" snow thrower to clear driveways and sidewalks. Or use a 48" dozer blade to move light snow.

"B" Series tractors let you choose either a 42" dozer blade or 37" snow thrower to power you through snow removal jobs. These powerful tractors run fine in cold weather . . . and an optional cab enclosure will keep you out of it. B-145 tractor takes a snow thrower or blade. This battery-powered unit has super traction with 70% of its weight over the rear wheels.

Even the "A" Series of lawn tractors lead a double life. Hook up a 42" dozer blade to either A-80 model and take care of your light snow removal problems.

(1) No need to stow your Wheel Horse for the winter! A dozer blade makes short work of snow removal. (2) For snow-belt areas, snow throwers in 37", 42" and 48" sizes (shown) work great. (3) Discharge chute rotates from driver's seat.

One acre or more, farm work goes faster when you own a Wheel Horse.

We Recommend "D" Series

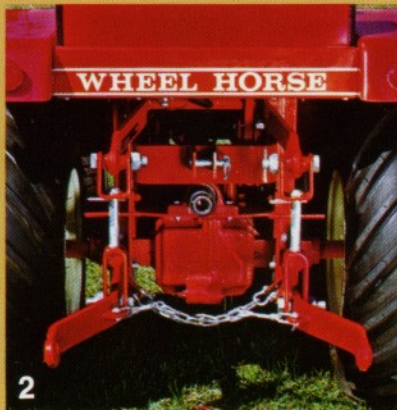

The "mini" farm — a lifestyle requiring specialized equipment for a variety of jobs. Your tractor needs are more than those of the weekend gardener. The Wheel Horse "D" Series matches these needs completely.

Big attachments like the 50" tiller work over the soil in last year's garden with one pass. It mounts on 3-point hitch and is powered by the rear PTO available for "D" Series tractors (standard equipment on D-200). Or use an allied mold board plow and disc to put the soil in shape for planting. Level out that long driveway with a 50" mid-mount grader blade or mow down that acreage with a wide 60" rear mount mower. Allied attachments, such as sickle bar mowers and ganged reel mowers make short work of special problem

areas. Use a front end loader for moving hay, dirt or manure. Be sure to ask your Wheel Horse dealer for the Attachment and Accessory Catalog that describes the line of Wheel Horse and Allied attachments available for "D" Series tractors. Dual, independent hydraulic lifts, 3-point category "O" hitch and disc turning brakes give you farm tractor versatility. Standard and extra-wide cleat tires are available as options to give your "D" Series tractor firm footing in soft or muddy soil during gardening applications. In winter, your tractor easily clears long rural driveways with snow blade or thrower — and an enclosed cab is available to take the bite out of winter wind.

Wheel Horse "D" Series tractors thrive on hard work. They'll turn your farm tasks into "mini" chores.

(1) 60" rear mower gets its muscle from rear power take-off on "D" Series tractors. (2) 3-point, category "O" hitch enables "D" tractors to utilize many farm-type implements. (3) 50" tiller gives you an advantage in large gardens. (4) Front loader is available as an allied attachment.

Lots of grass to mow? Here's our advice for getting the job done fast.

We
Recommend
"C" & "D"
Series

Try one of the Wheel Horse "C" or "D" Series tractors. Your desire for plenty of elbow room has given you an acre or more of grass to mow. Maybe it's gently rolling or downright hilly. No problem for these tractors. Four "C" models and three "D" models zero in on your individual lawn mowing requirements. Rugged rotary mowers give you mowing widths from 36" to 60" . . . or your dealer can supply allied attachments that take on even heavier tasks. D-200 and D-180 tractors accept the big 60" rear mower for those heavy cutting jobs — D-160 teams up with 48" side discharge mower. "C" Series tractors can handle 48" side discharge, 42" side discharge and 36" side or rear discharge mowers. C-185 battery-powered model cuts a wide 42" swath with optional 42" front

mower. It can be dealer modified for side or rear discharge. To keep things neat while you're mowing, hook up a 31" or 38" lawn sweeper, or a powerful lawn vacuum ("C" Series only). 48" sickle bar mowers and ganged reel mowers up to 11 feet wide in a number of configurations give you the lawn expertise of a greens keeper. Rugged as they are, these tractors treat your valuable lawn with care on Turf Saver tires — extra wide versions are available on the "D" Series for even greater flotation. Headlights let you squeeze more mowing time out of your busy day. Hydraulic and electric attachment lifts are available to give you fingertip control of mowers and other lawn care attachments. "C" Series tractors can be equipped with a handy power vacuum that picks up clippings and debris as you mow.

(1) For mowing large grass areas, D-200 and 48" mower make an efficient team. (2) Gang reel mowers are available as allied attachments — in a variety of configurations. (3) C-185 with 42" front mower gets your mowing jobs done fast.

Suburban lawn and garden grooming starts with dependable Wheel Horse tractors.

We
Recommend
"A" & "B"
Series

Maybe you prefer the suburban way of life. Our "A" and "B" tractors are the answer to your residential lawn and garden needs. A total of six models to choose from . . . all designed for top performance. "B" Series tractors give you exciting flexibility. They'll shape up your lawn and make themselves right at home in your garden. They plow, till and cultivate just like the big ones. In winter, the 8 and 10 HP "B's" have ample clout to handle snow with blade or thrower.

The "A's" are designed primarily for lawn care — mowing, rolling and aerating. The dependable 8 HP A-80 comes with its own 32" mower. And you can choose electric or recoil start. The A-80 gives you an all-gear, 4-speed manual transmis-

sion for plenty of lawn care power. Wheel Horse rider mowers combine great visibility and superb handling.

The new battery-powered tractors and riding mowers keep the neighborhood quiet while you mow. A-60 rider has built-in 32" mower; A-65 rider has built-in 36" mower; and the B-145 tractor handles an optional 42" front mower. All three can pull optional lawn care attachments. The A-50 gas-powered rider gives you lawn tractor features in a quality rear engine rider. Its single blade 26" mower gets the cutting done fast . . . gives you more time to cook out, play golf or listen to the ball game. Its 4-speed transmission gives you two forward speeds and two reverse.

Wheel Horse "A" and "B" Series tractors and riders can match your residential needs perfectly . . . and fit your budget.

(1) B-80 with 36" side discharge mower handles mowing for small to medium size suburban lawns. (2) A-50 rear engine riding mower, (3) A-60 Electric Horse, and (4) A-80 lawn tractor meet small lawn mowing needs superbly.

FEATURES

WHEEL HORSE for 1975

Automatic transmission — All Wheel Horse "Automatics" utilize a Hydrostatic (oil) drive, with single lever speed control. A "return to neutral" pedal quickly locks the hydrostatic system to provide dynamic braking action.

Exclusive all gear-drive 8-speed transmission gives you a choice of 6 speeds forward, 2 reverse.

Patented uni-drive with all gear 8-pinion differential gives you trouble free, smooth operation and long life.

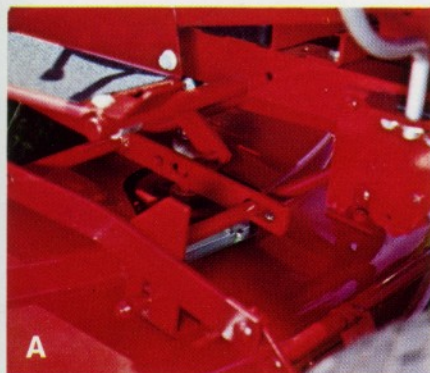

Spring suspension seat — Standard on all Wheel Horse tractors and riders (except A-50). Helps give you a soft, easy ride on rough terrain.

Safety label — All Wheel Horse tractors and mowing attachments carry the OPEI (Outdoor Power Equipment Institute) safety label stating they conform to the latest safety standards.

Turf Saver tires — All Wheel Horse tractors have wide low pressure tires to protect your lawn and give good traction.

Other features include soft-feel steering wheels for sure, safe grip. PTO brake that stops attachments fast for added safety. Ammeters are standard on most models to indicate electrical system is charging properly. Headlights and taillights are standard equipment on most models.

23

Tach-a-matic™ Hitches... as simple as A-B-C-D!

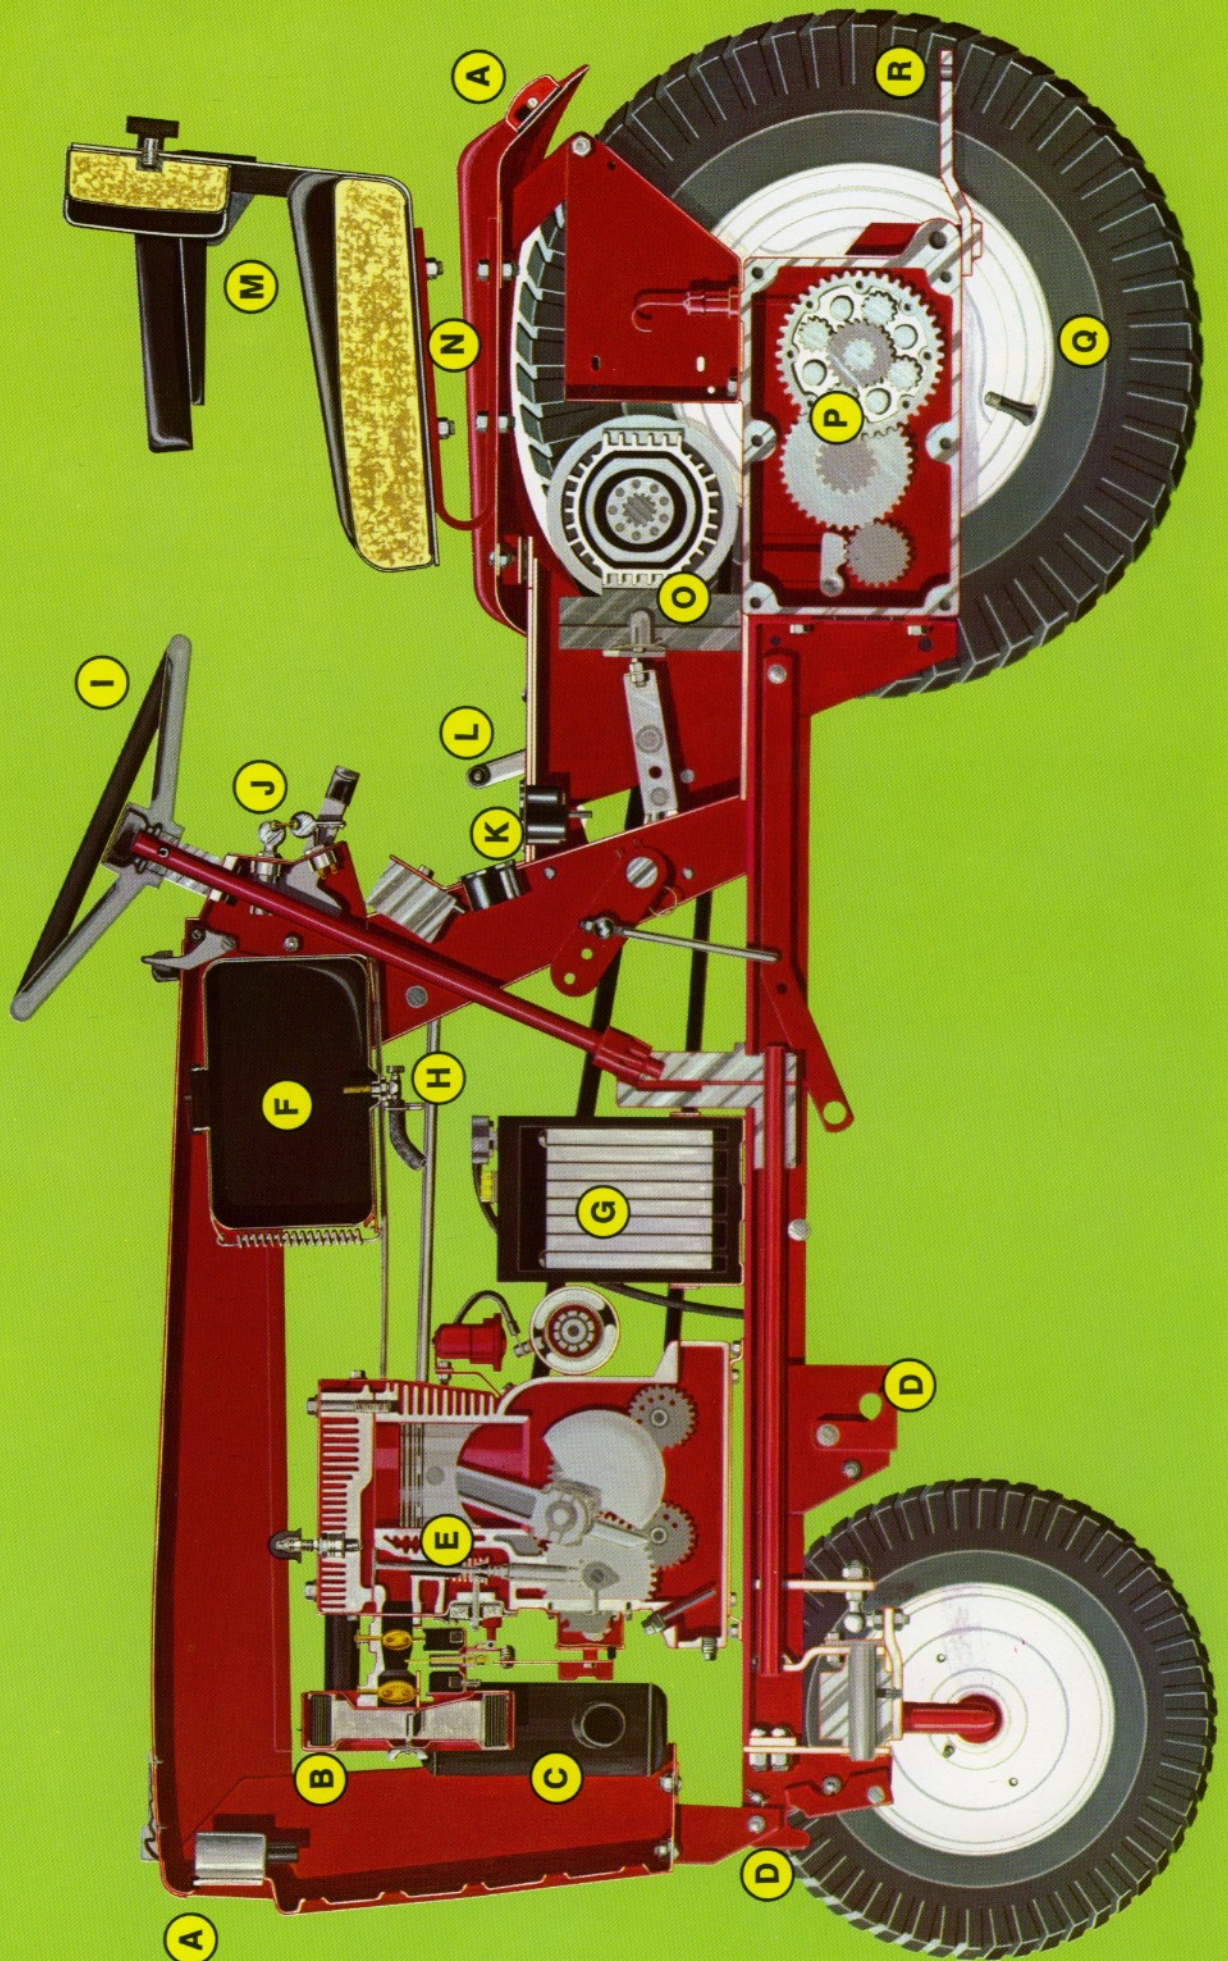

Mower mounting is one example:

- (A) Align mower under tractor and attach lift link.
- (B) Raise mower with attachment lift, insert in Tach-a-matic hitch, close latch.
- (C) Snap idler box in front Tach-a-matic hitch.
- (D) Install belt — adjust tension and you're ready to mow!

Tach-a-matic also speeds installation of other front and mid-mount attachments such as grader blade, snow/dozer blades, snow thrower, and front section of cultivator.

Tach-a-matic hitches are standard equipment on all "B", "C" and "D" Series tractors.

INSIDE LOOK

Here's the "inside" reason your Wheel Horse can tackle just about any lawn or garden challenge.

- A. Head and taillights** provide an extra measure of safety for evening work. They turn off when tractor is shut off so you can't accidentally discharge the battery.
- B. Replaceable dry air cleaner** element helps keep your Wheel Horse running like new long after purchase. Specially designed to trap harmful dirt before it gets into your engine.
- C. Oversized muffler** keeps noise at a minimum. Recessed under the hood to reduce accidental burns.
- D. Tach-a-matic hitches** both front and mid mean most attachments can be installed, or removed in just minutes, and there's no need for tools! Align, lift, and it's on. It's a Wheel Horse exclusive.
- E. Cast iron engine** means dependability for many years to come. Their use has helped Wheel Horse keep its fine tradition of high resale value.
- F. Two gallon fuel tank** allows you to do more work between fuel-ups. The tank is mounted away from the engine so fuel-ups are safer.
- G. 42 amp hour battery** provides that extra power needed for those cold morning starts. "Non-spill" caps help keep acid where it belongs.
- H. Fuel shut off valve** adds safety to every Wheel Horse. Fuel supply can be stopped at the tank when tractor is not in use.
- I. Soft feel 13" steering wheel** adds comfort to the ride. Designed to help prevent hand slippage in all types of weather.
- J. Safety interlock system** helps prevent accidental starts. Keeps tractors from starting with a power-driven attachment engaged. All Wheel Horse tractors and their attaching mowers carry the OPEI (Outdoor Power Equipment Institute) Safety Label.

- K. Ammeter and engine hour meter.** Ammeter is standard on most models. You'll know immediately if the battery is being charged properly. Engine hour meter (standard on D-200 and C-160 automatic, optional on most models) tells when preventive maintenance is due.
- L. Parking brake** is standard on all tractor models. We recommend our parking brake be engaged whenever vehicle is not in use — as a safety precaution.
- M. Polyfoam two-piece seat** offers driver comfort. Tilt-away arm rest swings up and out of the way for easy boarding (D-200 and C-160 automatic only). Adjustable back rest adds a personal touch. Vinyl covered and waterproof for long life.
- N. Spring seat suspension** gives driver an easier ride. Smooths out rough terrain. Absorbs bumps and jolts. Safety seat switch shuts off engine if operator leaves tractor with power attachment engaged.
- O. Automatic drive** offers you an infinite choice of speeds. No clutching, no shifting. Utilizes the exclusive patented Wheel Horse Uni-Drive transaxle. Ground speed is controlled by a variable speed lever within easy reach of driver. Allows power driven attachments to run at full RPM while varying ground speeds.
- P. Unidrive**, patented transaxle is a Wheel Horse exclusive. A typical example of our 29 years of progress. These transaxles provide longer, more dependable service.
- Q. Turf saver tires** with low pressure design provide a safer, softer operation. Help protect valuable lawns with their extra flotation. Cleat tires available as a dealer installed option.
- R. Drawbar hitch** is standard on all tractors. Allows attaching of aerator, wagon, dump cart, sweepers, lawn roller and many other work-saving pull-type attachments.

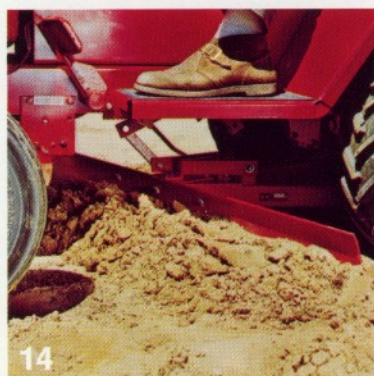

Wheel Horse work-saving attachments help match your needs to the letter... four seasons of the year.

Wheel Horse attachments give your tractor added versatility. In addition to traditional "lawn mowing" capabilities, your Wheel Horse can save you hours of time and work on the many tasks you encounter in yard or garden. Look through the wide selection of attachments then choose the ones best suited for the work you have in mind. Your Wheel Horse dealer can supply additional information and show you a complete line of allied attachments that give you even more tractoring flexibility. Ask him for a free copy of our attachment catalog.

Special attachments for battery-powered tractors can be seen on page 12.

14

1. 60" Rear mount mower (5-0901). This heavy duty rear mount mower cuts large acreage fast. Rear PTO drive mounts on 3-point hitch for use on D-200 and D-180 only.

1

2. Here's a bottom view of our 60" mower — note the special grass deflectors and extra heavy-duty spindles.

3. 48" Side discharge mower. (5-1221 "D" Series) (5-1211 "C" Series) A big mower for big lawns. 3 Hi-lift blades give a smooth, even cut. Full floating design helps prevent scalping. Tach-a-matic mounting, reliable belt drive—for easier installation and removal. Chute guard tilts up for transporting through narrow openings.

4

4. Here's a bottom view of our 48" mower — note the curved one piece deck — no place for clippings to stick and clog your mower. Baffles help create air lift to assure smooth, even cut.

5. 42" Side discharge mower (5-1011). Required for use with power lawn vacuum (7-2613). 3 Hi-lift blades give smooth, even cut. One piece deep dish construction helps prevent clogging. Adjustable cutting height 1½" to 3½". Chute guard tilts up for transporting through narrow openings.

7

6. 36" Side discharge mower (5-0722). Full floating design and 3 Hi-lift blades combine for carpet smooth cut. Tach-a-matic mounting. All Wheel Horse mowers carry the OPEI (Outdoor Power Equipment Institute) Safety Label.

7. 36" Rear discharge mower (5-0622). Ideal for use with lawn sweeper. Lets you pick-up clippings as you mow. Full floating design minimizes scalping. 3 Hi-lift blades give a smooth even cut. Adjustable cutting height 1½" to 3½".

8. 50" Tiller (7-1261). Pulverizes garden soil. Mounts on 3-point hitch and is PTO driven. Removable tines narrow tiller to 38". A must for the person with a large garden. For "D" Series only.

11

9. 36" Tiller (7-1252). Ideal for the person with a green thumb. Breaks-up and pulverizes garden soil. Designed for quick installation and removal. Tilling depth 4" to 6". Prepares most gardens for planting quickly and easily. Special end covers and drag plate help prepare a smooth seed bed and keep dirt from covering up plants in adjoining rows.

10. 48" Snow thrower (6-7452). Cuts through deep drifts easily. PTO driven, mounts in front Tach-a-matic hitch. Chute rotates 240°. Raises and lowers hydraulically. For "D" Series only.

11. 42" and 37" Snow throwers (6-6214 and 6-0202). Mounts in front Tach-a-matic hitch. Heavy duty auger. 180° chute rotation puts snow where you want it. (6-0202 fits "B" Series, 6-6214 fits "C" Series.)

15

12. 56" Snow/dozer blade (6-1142 "D" Series). Use to plow snow, move dirt, sand, and gravel. 30° index left or right. For use on all "D" Series tractors only.

13. 42" Snow/dozer blade (6-7123, A-80) (6-2132 "B" "C" Series.) Plows snow, moves sand, dirt or gravel. 30° index left or right. Reversible scraper blade.

14. 50" Grader blade (7-1122). Handy in dirt, sand or gravel. Use to level, grade, or terrace. Raises and lowers hydraulically. Index 20° left or right. ("D" Series only.)

15. 40" Grader blade (7-1114). Use to level, grade or terrace. Ideal for sand, gravel or dirt. Indexes 20° left or right of center. Mounts in Tach-a-matic hitch for easier installation. ("B" and "C" Series only.)

16. Power lawn vacuum (7-2613). Cleans while you mow. Picks up leaves, grass clippings, small twigs, litter from your lawn. Requires 42" side discharge mower (5-1011) and 2 Wheel Dump Cart (7-2212). The ultimate in lawn care. (For use on "C" models only.)

17. Cultivator (7-1723). Two-section cultivator helps remove weeds and aerate your garden. The 9 shovels have reversible blades for extended wear. (Fits "B" and "C" Series tractors.)

18. 32" Disc (7-1513). Eight 11" blades adjust to 4 different positions; 0°, 10°, 20°, 30°. Designed to hold 2 standard size concrete blocks for added weight. (Fits "B" and "C" Series tractors.)

19. Spiked tooth harrow (7-1612). 18 hardened steel reversible spikes break up and pulverize soil. Adjustable spike angle and individual spike depth adjustment for more penetration. (Fits "B" and "C" Series tractors.)

20. 36" Aerator (7-2412). Sharp spikes penetrate ground, allow food and moisture to reach roots. Adjustable 6" wheels make it easy to transport. Fits all tractors.

21. 32" Lawn roller (7-2312). Heavy duty welded steel tank weighs approximately 345 lbs. filled with water. Smooths out rough turf and bumpy ground. Scraper cleans drum. (Fits all models.)

22. 2-Wheel dump cart (7-2212). Holds loads up to 415 lbs. Dumps completely over for easy unloading. All steel construction. 16" pneumatic tires. Fits all models.

23. 4-Wheel wagon (7-2112). Big wagon for big loads. Hauls loads up to 600 lbs. 11 cu. ft. capacity. Removable sides for hauling bulky loads. All steel construction. Pneumatic tires. (Fits all tractors except A-60.)

24. Lawn sweepers (7-2513 and 7-2522). 31" or 38" lawn sweepers help keep your lawn clean. Sweeping height is adjustable from drivers seat. Convenient rear dumping. Fits all models. (38" sweeper not recommended for A-60.)

25. All Wheel Horse mower attachments carry the OPEI (Outdoor Power Equipment Institute) Safety Label stating they conform to the latest safety standards.

TIRE OPTIONS FOR "D" SERIES

26. Turf saver tires. High flotation and easier on lawns. Rear 27x9:50-15; Front 18x8:50-8. Tire chains available.

27. X-tra traction terra tires. Extra wide flotation tires give more traction without compaction. Rear 26x12:00-12; Front 18x8:50-8. Tire chains available.

28. Super terra grip tires (cleat). High flotation and excellent traction in most soils. Rear 27x8:50-15; Front 18x8:50-8. Tire chains available.

29. X-tra traction super terra grip tires (cleat). High flotation with maximum mobility. Rear 26x12:00-12; Front 18x8:50-8. Tire chains not recommended.

ATTACHMENTS

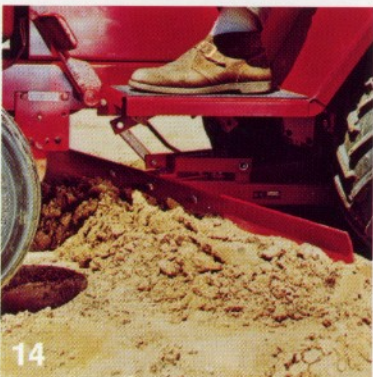

Wheel Horse work-saving attachments help match your needs to the letter... four seasons of the year.

Wheel Horse attachments give your tractor added versatility. In addition to traditional "lawn mowing" capabilities, your Wheel Horse can save you hours of time and work on the many tasks you encounter in yard or garden. Look through the wide selection of attachments then choose the ones best suited for the work you have in mind. Your Wheel Horse dealer can supply additional information and show you a complete line of allied attachments that give you even more tractoring flexibility. Ask him for a free copy of our attachment catalog.

Special attachments for battery-powered tractors can be seen on page 12.

Wheel Horse has been matching lawn and garden needs since 1946.

PERFORMANCE

Thousands of owners each year can attest to our determination to fit the right tractor to the job. We've been building lawn and garden equipment for 29 years. That's why Wheel Horse has grown from a backyard garage shop to a large, modern manufacturing facility. Automated assembly procedures, tight quality control and demanding inspections carry on the uniform quality that began back in 1946.

ENGINEERING

Quality tractors require innovative engineering. Examples are our patented Uni-drive transmission — a cast iron encased unit with heavy-duty parts throughout or our manual attachment clutch that is easily serviced or repaired. All products are engineered for minimum maintenance. We're confident you'll enjoy many trouble-free hours of service with your Wheel Horse tractor.

At the time of printing (12-74), product information and specifications, as shown, were correct. Wheel Horse Products, Inc. reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligation.

DEALER SALES AND SERVICE

Rounding out Wheel Horse dependability is a nationwide network of dealers who sell and service our tractors. Should your Wheel Horse need service some day, your authorized Wheel Horse dealer is specially trained to do the job. He stocks genuine Wheel Horse parts and attachments to meet your exacting needs. You'll find him listed in the yellow pages under "Lawn Mowers."

"Get a Horse" decals are yours free, just for sending a self-addressed stamped envelope to:
