WHEEL HORSE
lawn & garden tractors

A, B, C or D. There's a Wheel Horse series to perfectly match each of your basic needs.

A-SERIES for the small lawn. Mows, sweeps, rolls and aerates your lawn with the touch of a professional. Five models to choose from . . . 5 and 8 HP gas-powered riding mowers; a battery-powered rider; and two dependable lawn tractors in 8 or 10 HP versions. These lawn tractors do double duty! Each is capable of clearing snow in winter with an optional dozer blade. If you're a homeowner with a lawn that's too big for a walk-behind mower, but too small for a bigger tractor, this "lawn care line" is for you.

B-SERIES for small to medium lawns and gardens. Keeps your lawn in top shape, then goes to work in your garden. The '76 "B's" give you a full range of mowing and gardening capabilities. Gas-powered models are 7, 8 and 10 HP and each has the famous Uni-drive transaxle that provides six forward and two reverse speeds. A battery-powered garden tractor mows, tills and moves snow. And it refuels by just plugging in to any 110-volt, grounded household outlet.

The "B" Series: Hefty enough to work for you year 'round, yet economical to buy and operate. That's why these are among our best-selling lawn and garden tractors year after year.

C-SERIES for medium to large lawns and gardens. A dependable series of large garden tractors that gives you no-nonsense power and versatility. Five models for 1976. 12 and 16 HP gas models give you a choice of manual or automatic transmissions. There's a battery-powered model, too. It quietly supplies the mowing and gardening capabilities you'd expect in a full size garden tractor. Versatility. That sums up the Wheel Horse "C" Series for 1976. More than 25 different attachments are available to keep your tractor busy four seasons of the year.

D-SERIES for large lawns and gardens . . . and more. The finest group of garden tractors we've ever offered. Three models in all. A twin-cylinder 16 HP tractor; a deluxe 19.9 HP model with twin-cylinder cast iron engine; and our totally new 19.9 HP tractor with revolutionary four-cylinder, liquid cooled engine and other features that establish a new standard of excellence in lawn and garden tractors.

Options like a three-point hitch, turning brakes and a power take-off (standard on the D-250) give these performers "farm tractor" versatility. Three great models to meet the challenge of the largest lawns and gardens.

In the market for a lawn and garden tractor? The Wheel Horse "basics" make this your best year 'round choice.

BASIC

The line should let you choose exactly the tractor you need. You don't have to settle for a tractor that's a little smaller or a little bigger than you really need. Wheel Horse has one that's just right.

From a 5 HP riding mower to our powerful 19.9 HP, 4-cylinder garden tractor, one of our seventeen models for '76 will fit right in to your lawn and garden maintenance needs. You can choose your brand of power, too. Gasoline or battery-powered models match your idea of what a lawn and garden tractor should be. Selection: That's basic to any buying decision you make.

BASIC

A tractor should be tough enough to help with all your lawn and garden jobs. It should be able to handle all the outdoor chores your lifestyle demands. Sure, the primary use is mowing grass. But for the homeowner

with gardening, landscaping, debris removal to do, specialized attachments should be available to get the work done. Sturdy engines and transmissions supply ample muscle to operate attachments of all sorts. Your Wheel Horse tractor will stand up to years of lawn and garden work. And you'll appreciate its high resale value, too.

BASIC

Straightforward design should help reduce maintenance problems. And that saves you money in the long run. The basic simplicity of Wheel Horse design has paid off in thousands of trouble-free operating hours.

Routine maintenance is easier, too. You can get to the engine and other major components without messing with a lot of complicated sheet metal. Wheel Horse has left off the frills and fancy stuff to give you a basic, dependable lawn and garden tractor that keeps on running. Ask any Wheel Horse owner.

BASIC

Versatile attachments should make a great tractor even better. Just as you match the right tractor to your needs, you can also select the correct attachment for the specific job to be done. An incomparable line of front, mid

or rear-mount rotary mowers with cutting widths from 36" to a whopping 60" ("A" Series models come complete with mowers); lawn maintenance, gardening, landscaping and hauling attachments that are simple to put on and remove. Wheel Horse accessories let you "customize" your tractor for added comfort convenience. Whatever your job, Wheel Horse makes it easier. And that's the basic reason you buy a lawn and garden tractor.

The following pages give you details on the "basics" . . .
