- * 4 MPH MAXIMUM SPEED
- * FRONT TIRES 5:30 x 6
- * REAR TIRES 9:50 x 8
- * POWER PACK
 - (6) 6 VOLT BATTERIES

EGT-80 AND EGT-100 OPERATION

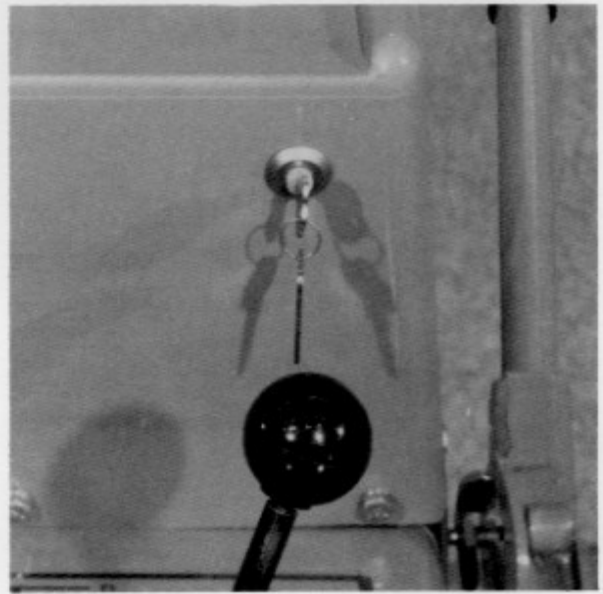

For the homeowner who desires a compact garden tractor, the EGT-80 and EGT-100 can't be beat. Their quick steering and short turning radius make them ideal for smaller lawns. Wide foot rests, easy to reach controls, comfortable steering wheels, and adjustable molded seats are standard equipment on both models.

BUILT-IN CHARGER

A fast power pack charger is standard equipment on both models, and it is controlled by the dial on the instrument panel. After charging simply unplug from your household outlet, store the cord under the hood, and you are ready to go.

KEY SWITCH

Security and safety are provided by the key switch. When turned on it releases the power from the battery and the tractor is ready for operation.
