

MOWER BLADE KIT

Models AP22, 23, 24, 25, 26, 27

INSTRUCTIONS

Blade Model	Description	Mower Model	Color Coding
AP22	18" Hi-discharge	AH36 (7/8" Motor Shaft)	Dark Blue
AP23	18" Std. -discharge	AH36 (7/8" Motor Shaft)	Red
AP24	14" Std. -discharge	AH42	Green
AP25	14" Std. -discharge	AA42	Black
AP26	18" Hi-discharge (insert type)	AH36 (3/4" Motor Shaft)	Black
AP27	18" Std. -discharge (insert type)	AH36 (3/4" Motor Shaft)	Yellow

The standard-discharge blades provide extended mowing range and lower mower motor loading than the hi-discharge blades. The hi-discharge blades may be useful for mowing in heavy, long or limp grass which requires higher discharge rates and more air flow.

The standard and hi-discharge blades are interchangeable, but blade sets must be of one type to provide maximum effectiveness. See Fig. 1 for assembly sequence. Observe the torque requirements on the blade bolt.

WARNING: Disconnect mower motor power cord(s) from the tractor plug(s) before handling mower.

Check all connections for tightness and determine that blade rotation is as indicated in Fig. 1.
