AN EXPLANATION OF SERIAL NUMBER INFORMATION

Serial number or year information given on any page is applicable only to parts listed and illustrated on that page.

When the parentheses include only the dash the part is used on all machines
except as noted in the description column (-)

When a serial number or year appears before the dash the part was introduced
beginning with that serial number or year and is still being used (000000-)

When a serial number or year appears after the dash the part was used up to
and including that serial number or year but was not used after that
serial number or year (-000000)

When serial numbers or years appear both before and after the dash the part was
used beginning with the first serial number or year but was not used
after the second serial number or year (000000-000000)

EXPLANATION OF CHANGE INDICATOR LINE

New and revised information is identified by vertical lines marked on the left-hand margin of revised pages. These lines indicate changes affecting the ordering of parts.
