*John Deere 38 Front Blade***NOTE**

When the parenthesis includes only the dash ..... ( - )  
and no Serial No. is listed it means the part may be used  
on all machines and is still a current part.

When a part is shown with the Serial No. before the dash ..... (0000- )  
it means the part was introduced on the machine begin-  
ning with that Serial No. and is still a current part.

When a part is shown with the Serial No. after the dash ..... ( -0000)  
it means the part was common to all machines up through  
that Serial No. but went out of production on all machines  
after that Serial No.

When a part is shown with the Serial No. before and after  
the dash ..... (0000-0000)  
it means that the part was introduced on the machine  
during the first Serial No. and went out of production on  
all machines after the second Serial No.
