

"ELECTRA" Model 2000

Award Winning Design

Battery Powered Electric Riding Lawn Mower

"A Lawn Mower for the 21st Century!"

"ELECTRA" Model 2000

The **TURF STAR 2000 "ELECTRA"** is the first battery powered riding mower that combines near zero turn capability with convenience of infinitely variable speed control. The **"ELECTRA"** will amaze you with its maneuverability, power, and quiet operating qualities. Combine that with its low center of gravity and low maintenance design (no belts or pulleys) and you have a mower built for the 21st century.

The **"ELECTRA"** features a 44" rear or side discharge deck with three cutting blades. The *"Quick-tach"* patent pending deck attachment system provides the owner with a floating deck that is simple to detach and reattach for the ultimate in deck and blade maintenance convenience.

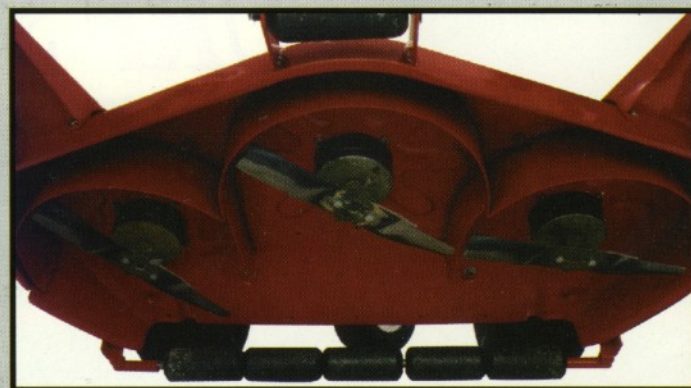

One word describes the
TURF STAR 2000 "ELECTRA" --
CONVENIENCE!

No gas or oil to mess with! No noxious fumes to worry about! No belts or pulleys to replace or adjust! Just plug in when finished and recharge overnight. Then mow up to 1.5 acres of lawn! Relax in knowing that every part of the **TURF STAR 2000 "ELECTRA"** is recyclable including its battery pack. Whisper Quiet! The **"ELECTRA"** may be the quietest riding mower ever made. With its simple effective control systems, near zero turn capability, and infinitely variable speed control, the **TURF STAR 2000** delivers pure mowing enjoyment!

Winner of the Popular Mechanics
"Design and Engineering Award - 1995"
